GUIDE FOR THE COMPATIBILITY CHECKLIST

Homemate's Username and Real Name

Keep track of the person's Username initially. Once you have talked with them, you can add their real name.

Ranking

You can use a simple ranking system with 10 as the most compatible and 1 as the least compatible. You can rank each item (Age, City/town, Timing etc.) or just the items that are most important to you. Then, you can use the average of your item rankings and put that number at the top beside the title "Ranking". You can quickly sort your checklists with those who have the highest ranking at the top of the pile.

Item Boxes

Fill in the item boxes when you are reading the person's profile. You may want to keep track of every item or you might only be interested in some of the items.

Meeting Notes
You can use this section for specific contact details, like email address or telephone number. You can add in any arrangements for meeting in person. You can even jot down your initial impressions of the person after talking or meeting with them.

Use the back of the sheet for more information or use a second or third sheet for each person.
